

# DEEKSHITHA P

Engineering Undergraduate | Specializing in  
Robotics and AI

☎ +91 7676331700    📍 Bengaluru, INDIA    ✉ deekshithashivu@gmail.com

---

## ABOUT ME

Motivated Robotics and AI engineering student with a strong interest in web development, Data Analytics and problem solving. Passionate about building practical projects, continuously improving technical skills, and preparing for impactful career opportunities in tech and government sectors.

---

## EDUCATION

BANGALORE INSTITUTE OF TECHNOLOGY  
ROBOTICS AND AI  
2023 – 2027

---

## PROJECTS

### RENTORA

Rentora is a web-based rental management platform that allows users to browse, list, and manage rental properties with ease. It features a responsive frontend and a backend-integrated system for handling user authentication, property listings, and inquiries efficiently.

### Early Cardiac Abnormality Detection Wearable Watch using IoT (Ongoing)

- Developing a wrist wearable healthcare system to monitor cardiac parameters and detect emergency conditions in real time.
  - Integrating sensors, microcontroller, and IoT technology for continuous health monitoring and alert generation.
  - Designed to send emergency notifications and live patient data for faster medical response.
- 

## WORK HISTORY

### Insurance Advisor (Part-Time) | SBI Life Insurance Company, Bangalore Mar 2025 – Present

Assisted clients in understanding and choosing suitable insurance plans.- Built skills in financial awareness, communication, and professional responsibility.
